The Study

The City of Pickering is undertaking a Study to complete a comprehensive analysis of the drainage system, identify deficiencies and develop a comprehensive drainage management strategy for the Hamlet of Claremont. The Study Area is shown in the Key Map below. Amec Foster Wheeler Environment & Infrastructure has been retained by the City of Pickering to complete the Claremont Drainage Plan.

The Process

The study will be conducted in accordance with Approach #2 for Master Plans, as outlined in the Municipal Engineers Association's, Municipal Class Environmental Assessment (EA) (October 2000, amended 2007, 2011 and 2015). The Study is intended to address the first two phases of the Master Plan Class EA process, and consultation with stakeholders (public and agencies) will be a key component of the Study. Public Information Centres (PICs) will be held to discuss matters related to the study, including problems, opportunities, alternative solutions, evaluation criteria, environmental impacts and mitigation measures. PIC dates and details will be advertised as the Study progresses.

Comments

This Notice of Study Commencement is being issued to notify the stakeholders of the project and invite comment. Comments and information regarding the Study will be maintained for reference throughout the project and will become part of public record. The information is collected under the authority of the *Environmental Assessment Act* or is collected and maintained for the purpose of creating a record that is available to the general public as described in s. 37 of the *Freedom of Information and Protection of Privacy Act*. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential.
