

Service Disruption at Pickering Civic Complex' Council Chamber

Purpose: Council Chamber Renovation

Duration: Monday, August 11, 2025 to Saturday, April 11, 2026

Construction for the Council Chamber Renovation will commence on August 11, 2025 and will continue until April 11, 2026. During this time, the Council Chamber will be closed.

An interior area around the Chamber in the Civic Complex lobby will be blocked off to allow the renovation of the wall between the Chamber and the lobby. An exterior area around the Chamber will be blocked off and reserved for the General Contractor's use. Please refer to the plan below for the approximate construction area.

Dust and noise mitigation measures will be implemented; however, some disruptions may still occur. Whenever feasible, service interruptions and particularly disruptive work will be scheduled outside of regular hours to minimize impact.

The area within the construction barriers will be an active construction site under the control of the City's contractor. Only authorized personnel may enter, under the supervision of the contractor, and while wearing all required personal protective equipment (PPE).

The street parking on the north side of the Civic Complex will be reserved for the use of the General Contractor (three spaces), as outlined below.
