## APPENDICES

- Appendix I Plan of Survey – not available
- Appendix II Fire Insurance Products
- Appendix III Chain of Title – not available
- Appendix IV City Directory
- Appendix V ERIS Report
- Appendix VI Government and Regulatory Information
- Appendix VII Aerial Photographs
- Appendix VIII Topographic Map
- Appendix IX Client Files – not available
- Appendix X Site Photographs
- Appendix XI Phase One Conceptual Site Model
- Appendix XII Qualification of the Assessors

## 1.0 EXECUTIVE SUMMARY

Terrapex was retained by Plaza 6 Inc. (Client) to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 666-682 Liverpool Road, in the City of Pickering, Ontario (the Phase One Property, hereinafter also referred to as the Site).

It is understood that the Client is proposing to develop the Site with residential housing, and the Site is currently being used for residential purposes. As the Site is not being developed into a more sensitive land use, a Record of Site Condition (RSC), is not required per Ontario Regulation (O. Reg.) 153/04 under the Environmental Protection Act (*Records of Site Condition – Part XV.1 of the Act*).

The date of the last work on all of the records review, interviews, and Site reconnaissance required for the Phase One ESA (per Section 28 (1) (a) of O. Reg. 153/04) is July 3, 2025, the date at which, in response to a request submitted by Terrapex under the Freedom of Information and Protection of Privacy Act, file information regarding the Site was received from the Ministry of the Environment, Conservation and Parks.

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the Phase One study area in order to satisfy the following Phase One ESA general objectives listed in O. Reg. 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- to determine the need for a Phase Two ESA; and,
- to provide a basis for carrying out any Phase Two ESA required.

Information regarding the location and identification of the Phase One Property and the party authorizing this study is provided in the table below.

Information regarding the location and identification of the Phase One Property and the party authorizing this study is provided in the table below. Refer to Figure 1 for the location of the Site, and to Figure 2 for the general layout and features of the Site at the time of the Site reconnaissance.

### SUMMARY OF PHASE ONE PROPERTY INFORMATION

|                                 |   |
|---------------------------------|---|
| Address:                        | 666 to 682 Liverpool Road, Pickering, ON  |
| Property Identification Number: | 26320-0322 (LT), 26320-0321 (LT), 26320-0320 (LT), 26320-0319 (LT), 26320-0318 (LT) |

|  |  |
|--|--|
| <b>Legal Description:</b>                        | 682 Liverpool Road: PT LTS 9 &10, BLK D, PL 65, PT 4, 40R1113, City of Pickering<br>678 Liverpool Road: PT LT 10, BLK D, PL 65 PT 5, 40R1113; City of Pickering<br>672 Liverpool Road: LT 11, BLK D, PL 65; City of Pickering<br>668 Liverpool Road: LT 12, BLK D, PL 65; City of Pickering<br>666 Liverpool Road: PT LT 13, BLK D, PL 65 AS IN D346617; City of Pickering |
| <b>UTM Coordinates (centre of site, WGS 84):</b> | 17T<br>East: 654199.77 m<br>North: 4853363.07 m  |
| <b>Name and Address of Owner:</b>                | Plaza 6 Inc.   |
| <b>Name and Address of Authorizing Party:</b>    | Mr. Milan Shah<br>Plaza 6 Inc.<br>23 Automatic Road,<br>Brampton, Ontario<br>L4S 4K6   |
| <b>Current Condition and Use(s):</b>             | 672 Liverpool Road is a vacant residential property in poor condition. The other properties are currently tenanted single-family dwellings.  |
| <b>Structures:</b>                               | Five residential dwellings, one detached roofed patio, and five sheds.   |
| <b>Site Area:</b>                                | 3,975.46 m <sup>2</sup>  |
| <b>Occupants (current):</b>                      | Multiple residential tenants   |
| <b>Other facilities of note:</b>                 | Inground swimming pool is located at 678 Liverpool Road. Three dwellings have attached garages.  |

Following the completion of the preliminary records review, Terrapex determined the following:

- The current registered owner of the Site is Plaza 6 Inc.
- The property is known to have been used as a residential with a record of fuel oil tank (AST) since at least 1966. As per section 22 of O. Reg. 153/04, since the date that this AST first occurred is not known, the date of first developed use is 1966.
- The Phase One Study Area consists of the Site and properties located wholly or partly within 250 m from the nearest point on a boundary of the Site. It need not include any properties beyond this distance.

Based on the review, evaluation, and interpretation of the information obtained from the records review, interviews, and Site reconnaissance, two potentially contaminating activities (PCAs), as listed in Table 2 of Schedule D of O. Reg. 153/04, or as determined by the QP, were identified within the Site. A further nine PCAs were identified within the Phase One Study Area, but only two resulted in areas of potential environmental concern (APECs) at the Site.

Based on the findings and results of the Phase One ESA, two APECs have been identified at the Site; therefore, additional investigations are required in order to support Durham Region's SSQ. A RSC is not required under O. Reg. 153/04, as the Phase One Property will not be changing to a more sensitive land use.

## 2.0 INTRODUCTION

Terrapex was retained by Plaza 6 Inc. (Client) to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 666-682 Liverpool Road, in the City of Pickering, Ontario (the Phase One Property, hereinafter also referred to as the Site).

It is understood that the Client is proposing to develop the Site with residential housing, and that the Site is currently being used for residential purposes. As the Site is not being developed into a more sensitive land use, a Record of Site Condition (RSC), is not required per Ontario Regulation (O. Reg. 153/04) under the Environmental Protection Act (*Records of Site Condition – Part XV.1 of the Act*).

As part of development applications, the Regional Municipality of Durham (Durham Region) requires applications to include a completed *Site Screening Questionnaire for Identifying Potentially Contaminated Development Sites in the Regional Municipality of Durham* (SSQ).

As per the SSQ, should any of the question responses be “yes”, then a Phase One ESA becomes mandatory and additional environmental reports (eg. Phase Two ESA, risk assessment, remediation), may be required.

### 2.1 OBJECTIVE

The objective of the investigation was to support the SSQ by identifying actual and potential sources of contamination associated from current and/or historical activities on the Site and properties within the Phase One Study Area (refer to Section 4.1.1. below), to satisfy the following Phase One ESA general objectives listed in O. Reg. 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- to determine the need for a Phase Two ESA or additional investigations;
- to provide a basis for carrying out any Phase Two ESA or additional investigations required; and,
- to provide adequate preliminary information about environmental conditions in the land or water on, in or under the Phase One Property.

### 2.2 PHASE ONE PROPERTY INFORMATION

Information regarding the location and identification of the Phase One Property and the party authorizing this study is provided in the table below. Refer to Figure 1 for the location of the Site, and to Figure 2 for the general layout and features of the Site at the time of the Site reconnaissance.

**SUMMARY OF PHASE ONE PROPERTY INFORMATION**

|  |  |
|--|--|

| <b>Legal Description:</b>                        | 682 Liverpool Road: PT LTS 9 &10, BLK D, PL 65, PT 4, 40R1113, City of Pickering<br>678 Liverpool Road: PT LT 10, BLK D, PL 65 PT 5, 40R1113; City of Pickering<br>672 Liverpool Road: LT 11, BLK D, PL 65; City of Pickering<br>668 Liverpool Road: LT 12, BLK D, PL 65; City of Pickering<br>666 Liverpool Road: PT LT 13, BLK D, PL 65 AS IN D346617; City of Pickering |
| <b>UTM Coordinates (centre of site, WGS 84):</b> | 17T<br>East: 654199.77 m<br>North: 4853363.07 m  |
| <b>Name and Address of Owner:</b>                | Plaza 6 Inc.   |
| <b>Name and Address of Authorizing Party:</b>    | Mr. Milan Shah<br>Plaza 6 Inc.<br>23 Automatic Road,<br>Brampton, Ontario<br>L4S 4K6   |
| <b>Current Condition and Use(s):</b>             | 672 Liverpool Road is a vacant residential property in poor condition. The other properties are currently tenanted single-family dwellings.  |
| <b>Structures:</b>                               | Five residential dwellings, one detached roofed patio, and five sheds.   |
| <b>Site Area:</b>                                | 3,975.46 m <sup>2</sup>  |
| <b>Occupants (current):</b>                      | Multiple residential tenants   |
| <b>Other facilities of note:</b>                 | Inground swimming pool is located at 678 Liverpool Road. Three dwellings have attached garages.  |

**2.3 PLAN OF SURVEY**

A plan of survey has not been provided for review.

**2.4 ENHANCED INVESTIGATION PROPERTY**

An enhanced investigation property is defined in O. Reg. 153/04 as a property that is being used or has been used, in whole or in part, for an industrial use or for commercial use as a garage, a bulk liquid dispensing facility (including a retail fuel outlet), or for the operation of dry cleaning equipment.

Based on the findings of the Phase One ESA (as documented herein), the Site is not an enhanced investigation property.

### 3.0 SCOPE OF INVESTIGATION

#### 3.1 GENERAL

The Phase One ESA was conducted in accordance with the current requirements of O. Reg. 153/04 and as outlined in the Terrapex proposal to the Client dated May 9, 2025. The five main components of the Phase One ESA scope of work are described below.

**Records Review:** A review was conducted of available historic and current environmental information pertaining to the Site and the Phase One Study Area in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04.

**Interviews:** An interview was conducted with a representative of the current owner of the Site. Representatives of previous owners were not contacted.

**Site Reconnaissance:** A reconnaissance of the Site and accessible properties within the Phase One Study Area was conducted for evidence of potential environmental concerns.

**Evaluation:** The information obtained from the records review, interviews, and Site reconnaissance was reviewed, evaluated and interpreted by the Qualified Person (QP) for this project (see Section 3.2 below) in consideration of the Phase One ESA general objectives and any uncertainty associated with the data sources.

**Reporting:** In accordance with the requirements of Schedule D of O. Reg. 153/04, this report documents the findings, conclusions, and recommendations of the Phase One ESA and includes:

- a table of the current and past uses of the Phase One Property;
- a table of identified potentially contaminating activities (PCAs) and a table of associated areas of potential environmental concern (APECs);
- a Phase One conceptual Site model (CSM); and,
- conclusions and recommendations made based on the evaluation and interpretation of information obtained for the Phase One ESA.

#### 3.2 QUALIFIED PERSON

The Phase One ESA was supervised by Ms. Sara Sutherland, of Terrapex, located at the Toronto Office.

Ms. Sara Sutherland holds a certificate of registration under the *Professional Engineers Act, 2000* and is a limited member of the Professional Engineers of Ontario and therefore meets the qualifications to be considered a Qualified Person for the purposes of conducting or supervising Environmental Site Assessments in Ontario per Section 5 (2) (b) of O. Reg. 153/04.

### **3.3 LIMITATIONS**

It should be noted that although Terrapex has attempted to verify information wherever possible, except where explicitly noted, we have relied upon the accuracy of information collected during the records review and interview components.

The general limitations of the study are provided in Section 8.3. Specific limitations of this Phase One ESA are as follows:

- The dwelling at 682 Liverpool Road was not accessible due to hazardous conditions related to structural integrity.
- The interior inspections were generally limited to basements and utility and furnace rooms due to privacy considerations.

In the opinion of the QP, none of the above limitations are considered to have compromised the objectives of the Phase One ESA.

## 4.0 RECORDS REVIEW

### 4.1 GENERAL

Terrapex obtained and reviewed records relating to the Site and surrounding properties within the Phase One Study Area, in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04. The records and sources of information reviewed are summarized below, and a list of all documents and data cited in this report is provided in Section 9.0.

#### 4.1.1 Phase One Study Area Determination

To determine the Phase One Study Area, Terrapex conducted a preliminary records review to identify any conditions that might warrant an expansion of the Phase One Study Area beyond the minimum required by O. Reg. 153/04. This review included searches / reviews of the following information:

- Aerial photographs;
- Provincial waste disposal site inventory documents; and,
- Reports documenting previously completed environmental investigations of the Site.

The preliminary review did not identify any potential concerns warranting an expansion of the Phase One Study Area. Accordingly, the Phase One Study Area was established to encompass all of the properties that were located in whole or in part, within 250 m of the boundaries of the Site.

The boundary of the Phase One Study Area is depicted in Figure 3. Note that all distances are calculated from the nearest property boundary of the Site to the nearest boundary of the feature/property in question and are approximate.

#### 4.1.2 First Developed Use Determination

Information obtained during the records review portion of the work program was used to determine the date of the first developed use of the Site, as defined in O. Reg. 153/04, is summarized in the table below.

##### FIRST DEVELOPED USE

| Year | Site Feature  | Potentially Contaminating Activity <sup>1</sup> | Reference/Source    |
|------|---|---|---------------------|
| 1946 | • Residential dwellings are located at 666, 668, 678 and 682 Liverpool Road | • None  | • Aerial Photograph |

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04.

Based on the above, the Site is known to have been developed for residential purposes before 1946. Therefore, the date of first developed use is considered to be prior to 1946.

#### **4.1.3 Fire Insurance Plans**

There are no fire insurance plans available for the Site or surrounding properties. A copy of the Enviroscan Report is included in Appendix II.

#### **4.1.4 Chain of Title**

A title search has not been conducted for the Site at this time.

#### **4.1.5 Environmental Reports**

No previous environmental reports for the Site were provided for review.

#### **4.1.6 Property Use Records**

A municipal directory search was conducted for the Site and neighbouring properties within 250 m for years between 1958 and 2024. Municipal directory information was obtained by ERIS.

Based on a review of the information obtained, no listings indicative of PCAs, or otherwise of potential environmental concern to the Site, were identified. The first listing for the Site is a listing in 1966 for 666 Liverpool Road.

### **4.2 ENVIRONMENTAL SOURCE INFORMATION**

#### **4.2.1 ERIS Environmental Databases**

Terrapex ordered a Standard database report from Environmental Risk Information Services (ERIS) for any records associated with the Site and properties within the Phase One Study Area. ERIS searched government and privately owned databases for environmental source information, including the information and documents listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04.

The report from ERIS is reproduced in Appendix V and presents information for the records found, a Site diagram which plots the locations of the properties for which records were found (provided sufficient address information was available), as well as an appendix which contains a list and descriptions of the databases ERIS searched.

The ERIS report identified a total of 112 listings within the Phase One Study Area, 53 of which pertain to the Site. Significant records pertaining to activities that are considered to be PCAs under O. Reg. 153/04 are summarized in Table 2. A copy of the ERIS report is provided in Appendix V.

**SUMMARY OF RELEVANT ERIS FINDINGS**

| Address            | Proximity <sup>1</sup>      | Database   | Year(s) <sup>2</sup>            | Details   | PCA <sup>3</sup> s/Potential Concerns                             |
|--------------------|-----------------------------|--|---------------------------------|---|---|

<sup>1</sup> direction and approximate distance to nearest Site boundary<sup>2</sup> For SCT listings, the year is the year the company was established.<sup>3</sup> As set out in Table 2 in Schedule D of O. Reg. 153/04.**4.2.2 Other Government and Regulatory Documentation**

Terrapex contacted representatives of provincial agencies to request any environmental information in their files related to the Site, and/or any available information pertaining to nearby

water bodies and areas of natural significance within the Phase One Study Area. Terrapex also conducted searches of available information provided on government websites. The responses received from the government agencies, as well as the additional information obtained through website searches, are summarized in the following sections. Copies of relevant documents and maps are included in Appendix VI.

#### ***4.2.2.1 Freedom of Information***

Terrapex submitted a Freedom of Information (FOI) request regarding documented environmental concerns related to the addresses of 666-682 Liverpool Road, Pickering, Ontario, including orders, spills, investigations, water generator registrations and certificates of approval, as well as general environmental concerns. In a notification dated July 3, 2025, the MECP indicated that after conduction a thorough search of its source system applications, they were unable to find any records related to the environmental property-related information request.

The Technical Standards & Safety Authority (TSSA) was contacted regarding records of fuel storage tanks at the Site. Terrapex received a response from TSSA on June 26, 2025. No records were found for the Site.

#### ***4.2.2.2 Areas of Natural Significance***

Terrapex conducted a search of the information provided in the following resources to identify any areas of natural significance (as defined by O. Reg. 153/04) at, or within 30 m of, the Phase One Property. The search comprised:

- Review of the Ministry of Natural Resources and Forestry (MNRF) Land Information Ontario (LIO) website to identify the following:
  - Provincial Parks and Conservation Reserves;
  - Areas of Natural and Scientific Interest (life science or earth science);
  - Provincially Significant Wetlands;
  - Niagara Escarpment Natural and Protection Areas;
  - Oak Ridges Moraine Natural Core or Natural Linkage Areas;
  - Wilderness Area.
- Review of Official Plans for upper tier and lower tier municipalities (as applicable).
- Review of extensive information sources (Section 9.0, References) to identify current threatened or endangered species at risk (as listed under O. Reg. 230/08), and their habitat, that have the potential to occur at, or within 30 m of, the Phase One Property.

The information gleaned from these sources is summarized in the table below.

## SUMMARY OF REVIEW FINDINGS FOR AREAS OF NATURAL SIGNIFICANCE

| Feature   | Present | Details   |
|---|---------|---|
| Provincial Park/Conservation Reserve  | No      | None  |
| MNRF Provincially Significant ANSI  | No      | None  |
| Significant Woodland  | No      | None  |
| MNRF Provincially Significant Wetland   | No      | Wetlands are identified to be present in the southeast and northwest portions of the Phase One Study Area. However, they have not been identified as provincially significant.        |
| Environmentally Significant in Municipal Official Plan                          | No      | Upper and lower tier municipality Official Plans were reviewed and did not indicate the Site or the Phase One Study Area as being located within an environmentally significant area. |
| Designated Natural or Protection Area by Niagara Escarpment Plan                | No      | None  |
| Threatened/Endangered Species & Associated Habitat <sup>1</sup>                 | No      | There are no species or habitat at risk with potential to occur on-Site or within 30 m of the Site.   |
| Designated Natural Core or Linkage Area by Oak Ridges Moraine Conservation Plan | No      | None  |
| Wilderness Area   | No      | None  |

<sup>1</sup> Further study (including Site inspection) is required to determine if any lands identified as potential candidate habitat of threatened and endangered species (that are not also deemed an area of natural significance by other applicable definitions), can be excluded as an area of natural significance.

### 4.2.2.3 Other Documentation

Terrapex reviewed the Source Water Protection Information Atlas compiled by the MECP to determine Wellhead and Intake Protection Zones in the vicinity of the Site. There are no Wellhead or Intake Protection Zones within the Phase One Study Area. Site is located within the Frenchman's Bay Watershed. Accordingly, surface water drainage from the Site (other than what is captured into the municipal storm water sewer system) may ultimately flow to this water body.

### 4.2.3 Client File Information

No file information relating to the Site was available from the client.

## 4.3 PHYSICAL SETTING SOURCES

### 4.3.1 Aerial Photographs

Aerial photographs were selected (based on availability, quality, and scale) for review to identify changes to topographic features, as well as development of the Site and surrounding properties within the Phase One Study Area over the years. The earliest aerial photograph obtained for review was from the year 1946. An approximate 10-year intervening time frame between successive photographs/images was considered to be sufficient to permit a reasonable evaluation of the area development and apparent land use history.

The relevant features identified in the aerial photographs are summarized in the table below. It should be noted that identification of some specific features at the Site and surrounding areas

was precluded by the scale and resolution of the aerial photographs. Copies of the aerial photographs are included in Appendix VII.

#### SUMMARY OF AERIAL PHOTOGRAPH IMAGES

| Year | Source                     | Key Features - Site   | Key Features - Surroundings  | Possible PCAs/APECs   |
|------|----------------------------|---|--|---|
| 1946 | National Air Photo Library | <ul style="list-style-type: none"> <li>Site appears to have residential dwellings at 666, 668, 678, and 682 Liverpool Road. The remaining area of the Site is undeveloped.</li> </ul> | <ul style="list-style-type: none"> <li>The neighbouring properties are comprised of residential properties and agricultural</li> <li>Surrounding streets have been constructed including Liverpool Road, Commerce Street, Annland Street, Pleasant Street, and Wharf Street</li> </ul> | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 1954 | Hunting Survey Corporation | <ul style="list-style-type: none"> <li>Site appears similar to 1946 (poor resolution)</li> </ul>  | <ul style="list-style-type: none"> <li>Site appears similar to 1946 (poor resolution)</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 1964 | National Air Photo Library | <ul style="list-style-type: none"> <li>Site appears similar to 1954 (poor resolution)</li> </ul>  | <ul style="list-style-type: none"> <li>Additional residential properties with private driveways are developed adjacent to the east and further north of the Site.</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 1974 | National Air Photo Library | <ul style="list-style-type: none"> <li>Site appears to have additional residential structures in the eastern portion.</li> </ul>  | <ul style="list-style-type: none"> <li>Additional residential properties with private driveways are developed adjacent to the west of the Site.</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 1982 | National Air Photo Library | <ul style="list-style-type: none"> <li>An inground swimming pool is located on the western portion of 678 Liverpool Road property.</li> </ul>   | <ul style="list-style-type: none"> <li>The neighbouring properties appear similar to 1964</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 2002 | First Base Solutions       | <ul style="list-style-type: none"> <li>Site appears similar to 1982</li> </ul>  | <ul style="list-style-type: none"> <li>The neighbouring properties appear similar to 1982</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 2014 | First Base Solutions       | <ul style="list-style-type: none"> <li>Site appears similar to 2002</li> </ul>  | <ul style="list-style-type: none"> <li>The neighbouring properties appear similar to 2002</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |
| 2024 | First Base Solutions       | <ul style="list-style-type: none"> <li>Site appears similar to 1982</li> </ul>  | <ul style="list-style-type: none"> <li>The neighbouring properties appear similar to 2014</li> </ul>   | <ul style="list-style-type: none"> <li>None identified</li> </ul> |

Based on the review of the aerial photographs described above, the surrounding properties within the Phase One Study Area comprised residential land use since 1946. In 1946, the Phase One study area appears to have been rural/residential, with residential dwellings and agricultural operations.

Based on the above, the land uses at surrounding properties identified from the review of aerial photographs are not considered to represent a potential concern for the environmental quality of soil and groundwater at the Site.

### 4.3.2 Topography, Hydrology, Geology

A topographic map of the Site and Phase One Study area was obtained from Atlas of Canada – Toporama. Geological plans for the Site were also reviewed. A summary of reviewed information is presented in the table below:

#### SUMMARY OF TOPOGRAPHY, HYDROLOGY AND GEOLOGY

|   |  |
|---|--|
| <b>Site &amp; Regional Topography:</b>      | The Site is generally flat. No major topographic features are mapped on the Site. The Phase One Study Area generally slopes to the east towards the Frenchman's Bay, which flows southerly towards Lake Ontario.   |
| <b>Approximate Site Elevation:</b>          | 85 m above sea level (asl).  |
| <b>Surface Water Drainage:</b>              | Overland to off-Site catch basins, and on-Site infiltration.   |
| <b>Inferred Groundwater Flow Direction:</b> | Local groundwater flow direction is inferred to be to the East, based on proximity to Frenchman's Bay located approximately 180 m southwest of the Site, and the regional groundwater flow is inferred to be to the south towards Lake Ontario, located approximately 480 m south of the Site. |
| <b>Physiography and Soil Stratigraphy:</b>  | Clay Plain (or Iroquois Plain), which are characterized by flat topography underlain by glaciolacustrine deposits. These consist predominantly of fine-textured, low permeability silty clay to clay sediments.  |
| <b>Bedrock and Approximate Depth:</b>       | Upper Ordovician shale, limestone, dolostone, and siltstone of the Georgian Bay Formation. Bedrock is anticipated to be approximately 40 m below grade.  |

The topographic map is reproduced in Appendix VIII.

### 4.3.3 Fill Materials

A fill pile of unknown origin is present at the Site at the 672 Liverpool Road property, located on the driveway, at the back of the dwelling. No deleterious material, staining or odours was observed in the fill material.

### 4.3.4 Water Bodies and Areas of Natural Significance

Based on a review of information and records in the preceding sections, a summary of water bodies, areas of natural significance, and groundwater sensitivity information within the Phase One study area is provided in the table below.

#### WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE

|  |  |
|--|--|
| <b>Surface Water:</b>                        | The Site does not include, and is not adjacent to, or within 30 m of a water body, as defined in O. Reg. 153/04. The nearest water body is Frenchman's Bay situated approximately 180 m to the southwest of the Site. This water body ultimately discharges into Lake Ontario, a known regional groundwater discharge zone, located approximately 480 m south of the Site. |
| <b>Area of Natural Significance:</b>         | None at, or within 30m of the Site.  |
| <b>Wellhead and Intake Protection Areas:</b> | The Phase One Property or the Phase One Study Area is not located within the Wellhead and Intake Protection Area.  |

|                                  |   |
|----------------------------------|---|
| Municipal Drinking Water System: | Potable water supply wells may exist within the Phase One Study Area. |
|----------------------------------|---|

#### 4.3.5 Well Records

Based on a review of information and records in the preceding sections, there are 17 well records in the Phase One Study Area, none of which were on-Site. Two well records were identified as water supply wells, seven records were identified as monitoring and testing wells, while the remaining well records were for other purposes (i.e. abandonment or unknown).

It should be noted that many wells in the province have been decommissioned or abandoned without appropriate reporting to the MECP; in addition to issues regarding the accuracy of well locations, some MECP database listings pertain to wells that are possibly no longer in use or in existence. The approximate well locations are shown on Figure 3.

A summary of relevant water well records with sufficient information on the hydrogeological and geological characteristics of the Phase One Study Area are summarized in the table below:

**SUMMARY OF SELECTED WATER WELL RECORDS**

| Well ID/ Tag | Year | Type of Well    | Location                      | General Stratigraphy  | Approximate Depth to Water Table (m bgs) |
|--------------|------|-----------------|-------------------------------|---|--|
| 1907327      | 1985 | Water Supply    | Approximately 190 m southwest | Fill to 0.6m bgs, clay and sand to 8.2 m bgs. Bedrock not encountered.  | 2.4                                      |
| 4601886      | 1961 | Water Supply    | Approximately 80 m east       | Clay to 6.1m bgs, and shale at 6.4 m bgs. Bedrock not encountered.  | 6.1                                      |
| 7201701      | 2013 | Monitoring Well | Approximately 190 m north     | Sand to 3.7 m bgs, and sandy silt to 7.6 m bgs. Bedrock not encountered.                                      | N/A                                      |
| 7214782      | 2013 | Monitoring Well | Approximately 190 m north     | Sand to 3.7 m bgs, and sandy silt to 7.6 m bgs. Bedrock not encountered.                                      | N/A                                      |
| 7265177      | 2016 | Monitoring Well | Approximately 125 m southwest | Sand and gravel to 0.6 m bgs, clayey silt to 3.4 m bgs, and silty sand to 6.1 m bgs. Bedrock not encountered. | N/A                                      |
| 7265178      | 2016 | Monitoring Well | Approximately 125 m southwest | Sand and gravel to 0.6 m bgs, clayey silt to 3.4 m bgs, and silty sand to 6.1 m bgs. Bedrock not encountered. | N/A                                      |
| 7265179      | 2016 | Monitoring Well | Approximately 125 m southwest | Sand and gravel to 0.6 m bgs, clayey silt to 3.7 m bgs, and silty sand to 6.1 m bgs. Bedrock not encountered. | N/A                                      |
| 7360425      | 2020 | Monitoring Well | Approximately 125 m west      | Sand and stones to 4.6 m bgs, and shale at 6.1 m bgs. Bedrock not encountered.                                | N/A                                      |

Copies of the water well records are provided in Appendix VI.

#### **4.4 SITE OPERATING RECORDS**

Site operating records specific to an enhanced investigation property are not required, as the Site is not an enhanced property.

## 5.0 INTERVIEWS

### 5.1 SITE REPRESENTATIVE

A representative of the property owner with knowledge of the Site was interviewed by Terrapex. Relevant information obtained during the interview is summarized below.

#### SUMMARY OF SITE-KNOWLEDGEABLE PERSON INTERVIEW

|   |   |
|---|---|
| Name and Position of Knowledgeable Person:    | Mr. Milan Shah<br>Plaza 6 Inc.<br>23 Automatic Road,<br>Brampton, ON,<br>L6S 4K6  |
| Interview Date:                               | Email correspondence between May 7, 2025, and June 17, 2025   |
| Limitation(s) of Knowledge:                   | Knowledge of current ownership and tenants only.  |
| Site History, Use(s):                         | Site was likely developed for residential use in the 1950s  |
| Knowledge of Previous Environmental Reports:  | No reports are currently available  |
| Current or Previous Fuel or Chemical Storage: | Currently, the residences use natural gas. No known chemical storage, other than for residential use or for maintaining the swimming pool |
| Knowledge of Spills, Leaks, Discharges:       | None  |

The statements and information provided by Mr. Milan Shah were consistent with information obtained from other sources as part of the Phase One ESA investigation. No additional information pertaining to the Site could be provided.

### 5.2 SURROUNDING PROPERTY REPRESENTATIVE

No neighbouring properties were contacted as part of this Phase One ESA.

## 6.0 SITE RECONNAISSANCE

### 6.1 GENERAL REQUIREMENTS

The reconnaissance of the Site and the Phase One Study Area was conducted by Ms. Brianna Wong and Mr. Tal Litmanovitch of Terrapex, as follows:

#### SITE RECONNAISSANCE PARTICULARS

| Date, Time, and Duration of Investigation    | Weather Conditions    | Guide | Occupant/Use of Facility During the Investigation | Names and Qualifications of Persons Conducting the Investigation |
|--|-----------------------|-------|---|--|
| May 27, 2025<br>9:00 – 10:30 am<br>1.5 hours | Mostly Cloudy<br>19°C | N/A   | Residential purposes                              | Ms. Brianna Wong, B.Sc.  |
| June 23, 2025<br>12:30 – 1:30 pm<br>1 hour   | Sunny<br>35°C         | N/A   | Residential purposes                              | Mr. Tal Litmanovitch, MSc.                                       |

Cursory observations of the surrounding properties within the Phase One Study Area made during the Site reconnaissance were limited to areas visible from the Site or from publicly accessible areas and vantage points. During the Site reconnaissance, Terrapex photographed the general Site layout, as well as any specific environmental concerns identified on the Site or on surrounding properties within the Phase One Study Area.

Specific limitations encountered during the Site reconnaissance are provided in Section 3.3.

The Site location plan is shown on Figure 1. The Site features are shown on Figure 2. Selected photographs including general descriptions are provided in Appendix X.

### 6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

#### 6.2.1 Site Description, Structures, and Other Improvements

The Site is located at 666 to 682 Liverpool Road, Pickering, Ontario, accessed from Liverpool Road to the west. At the time of inspection, the Site was operating for residential purposes. A summary of the constructed features of the Site is provided in the table below.

## STRUCTURES AND OTHER SITE IMPROVEMENTS

| Feature                        | Quantity | Age            | Description   | Location                         |
|--------------------------------|----------|----------------|---|----------------------------------|
| <b>Building(s):</b>            | 5        | ~ 80 years old | <p>4 detached residential properties:</p> <ul style="list-style-type: none"> <li>• 666 Liverpool Road: 1 level with an attic, 1 shed</li> <li>• 668 Liverpool Road: 2 floors with a basement level and an attached two-door garage</li> <li>• 678 Liverpool Road: 1 floor with a basement level, and 3 sheds</li> <li>• 672 Liverpool Road: 1 level with an attached garage (converted to additional living space)</li> <li>• 682 Liverpool Road: 1 level with a basement with an attached garage (converted to additional living space)</li> </ul> | On-Site, Eastern portion         |
| <b>Below-Grade Structures:</b> | 2        | ~ 80 years old | A basement level is located in the residential properties at 668 and 678 Liverpool Road   | On-Site, central-eastern portion |
| <b>Other Structures:</b>       | 2        | Unknown        | A utility pole located on the front lawn of 672 Liverpool Rd, and one between the lot of 666 and 668 Liverpool Rd   | On-Site, Eastern portion         |
| <b>Paved Areas:</b>            | 5        | Unknown        | Paved driveways for all properties, east of each residential properties leading to Liverpool Road   | On-Site, eastern portion         |

### 6.2.2 Storage Tanks

A summary of the storage tank(s) observed at the Site during the inspection is provided in the table below.

#### SUMMARY OF STORAGE TANKS OBSERVED AT THE SITE

| Tank ID | Construction | Age (yrs) | Contents    | Volume (L) | Status  | Location                      |
|---------|--------------|-----------|-------------|------------|---|-------------------------------|
| 1       | Steel        | Unknown   | Heating Oil | ~1,040     | Fill pipe observed, indicating the presence or previous existence of a heating oil tank. No vent pipe was observed. | 666 Liverpool Road crawlspace |

### 6.2.3 Water Sources

A summary of the potable and non-potable water sources is provided in the table below.

#### SUMMARY OF WATER SOURCES

| Source            | Quantity | Age     | Description                 | Location  |
|-------------------|----------|---------|-----------------------------|---|
| Potable Water     | 1        | Unknown | Municipally supplied water. | Water valve is located on the east side of the property |
| Non-Potable Water | 0        | N/A     | None observed.              | N/A   |

### 6.2.4 Underground Utilities

A summary of the buried utilities at the Site is provided in the table below.

#### UTILITIES PRESENT ON SITE

| Utility        | Present on Site | Description & Location   |
|----------------|-----------------|--|
| Electrical     | Yes             | Below grade running north to south through the Site  |
| Gas            | Yes             | Below grade running north to south through the Site  |
| Oil/Fuel       | Yes             | A fuel oil tank fill pipe was observed at 666 Liverpool Road   |
| Sewer          | Yes             | Municipal sanitary sewer and storm sewer present below grade running north to south through the Site |
| Water          | Yes             | Below grade running north to south through the Site  |
| Communications | Yes             | Below grade running north to south through the Site  |

### 6.2.5 Interior Features of Buildings and Structures

The interior features of buildings and structures present at the Site are summarized in the table below.

#### INTERIOR FEATURES OF BUILDINGS AND STRUCTURES

| Feature      | Building #  |
|--------------|---|
| Construction | <p><b>666 Liverpool Road:</b><br/>Brick and mortar along east face; vinyl siding along south, north, and west faces of dwelling</p> <p><b>668 Liverpool Road:</b><br/>Brick and mortar for bottom level of dwelling; vinyl siding for second storey, mixed brick and vinyl siding for attached two-car garage; enclosed (possibly fibreglass) deck in backyard</p> <p><b>672 Liverpool Road:</b><br/>Dwelling constructed on concrete slab on grade foundation; vinyl siding exterior</p> <p><b>678 Liverpool Road:</b><br/>Mixed brick and vinyl siding exterior</p> <p><b>682 Liverpool Road:</b><br/>Dwelling constructed of concrete basement and vinyl siding exterior</p> |

| Feature                    | Building #   |
|----------------------------|--|
| Exit/Entry Points          | Front and rear doors for all dwellings on Site. Additional exit/entry points through garages of 668, 672, and 682 Liverpool Road. Sheds have a single entrance.    |
| Heating System             | Central boiler/furnace observed in basements of 668, 678, and 682 Liverpool Road   |
| Cooling System             | Central A/C for all properties   |
| Drains/Pits/Sumps          | 668 Liverpool Road: Sump pump observed in basement; floor drain observed in basement bathroom<br>678 Liverpool Road: floor drain observed in basement laundry room |
| Unidentified Substances    | None observed  |
| Stains/Corrosion on Floors | None observed  |

## 6.2.6 Exterior Observations

A summary of observations of the exterior features of the Site is provided in the table below.

### OBSERVATIONS OF EXTERIOR FEATURES

| Feature                            | Details  | Approximate Location           |
|------------------------------------|--|--------------------------------|
| Sewage Works                       | Present on all properties on Site - operated and maintained by the Regional Municipality of Durham | Site                           |
| Oil/Gas or Water Wells             | None observed on Site  | N/A                            |
| Ground Surface                     | Asphalt paved driveways and grassy areas in the front and backyards for all properties on Site     | Entire Site                    |
| Railway Lines/Spurs                | None observed on Site  | N/A                            |
| Stained Soil/ Vegetation/ Pavement | None observed on Site  | N/A                            |
| Stressed Vegetation                | None observed on Site  | N/A                            |
| Areas of Fill/Debris               | One fill pile of unknown origin  | Backyard of 672 Liverpool Road |
| Potential PCA <sup>1</sup>         | PCA 30: Importation of Fill Material of Unknown Quality  | Backyard of 672 Liverpool Road |
| Unidentified Substances            | None observed on Site  | N/A                            |

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04, or otherwise as determined by the QP.

## 6.2.7 Enhanced Investigation Property

The Site is not considered an Enhanced Investigation Property.

### 6.3 PHASE ONE STUDY AREA, OTHER THAN PHASE ONE PROPERTY

A summary of the observations from reconnaissance of the Phase One Study Area is provided in the table below.

#### SURROUNDING PROPERTY FEATURES AND OBSERVATIONS

| Feature                                   | Approximate Location | Details   |
|---|----------------------|---|
| Land Use                                  | North                | Residential                                     |
|   | East                 | Residential                                     |
|   | South                | Mixed residential and commercial                |
|   | West                 | Residential                                     |
| Water Body                                | None                 | None observed within the Study Area             |
| Area(s) of Natural Significance           | None                 | None observed within 30 m of the Site           |
| Municipal Drinking Water System           | N/A                  | Supplied by the Regional Municipality of Durham |
| Well(s) for Consumption/ Agricultural Use | None                 | None observed within the Study Area             |
| PCA <sup>1</sup>                          | N/A                  |   |

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04, or otherwise as determined by the QP.

### 6.4 WRITTEN DESCRIPTION OF INVESTIGATION

The Site reconnaissance was conducted to identify, describe, and document specific items at the Site and at surrounding properties within the Phase One Study Area, in accordance with Schedule D of O. Reg. 153/04. Written descriptions detailing the observations made by Terrapex personnel during the Site reconnaissance are provided above in Sections 6.2 and 6.3, for the Site and the Phase One Study Area, respectively.

Discussions regarding the identification of PCAs on the Site and on surrounding properties with the Phase One Study Area are provided below in Section 7.2.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 CURRENT AND PAST USES**

The current registered owner of the Site is Plaza 6 Inc.. It is not known how long they have owned the property for. The Site was first developed, for residential use, by 1966. Prior to that it was rural/rural residential, without any structures. A summary of the current and past uses of the property is provided in Table 1 appended to this report.

### **7.2 POTENTIALLY CONTAMINATING ACTIVITY**

Based on the review, evaluation, and interpretation of the information obtained from the records review, interviews, and Site reconnaissance, two PCAs were identified on the Site and nine PCAs were identified within the Phase One Study Area. Details regarding the PCAs are provided in Table 2, appended to this report. Refer to Figure 4 for the location of the PCAs with respect to the Site and the Phase One Study Area.

### **7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN**

An area of potential environmental concern (APEC), as defined in O. Reg. 153/04, is the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One Environmental Site Assessment, including through, (a) identification of past or present uses on, in or under the Phase One Property and (b) identification of potentially contaminating activity.

A total of two APECs were identified pertaining to the Site as detailed in Table 3 appended to this report and shown on Figure 5.

### **7.4 PHASE ONE CONCEPTUAL SITE MODEL**

The Phase One Conceptual Site Model (CSM) has been developed based on the findings of the records review, Site reconnaissance, and interviews completed to date as described by the foregoing sections of this report. The Phase One CSM consists of the tabulated narrative in Appendix XI and the Figures contained in this report.

## **8.0 CONCLUSIONS**

### **8.1 WHETHER PHASE TWO ESA REQUIRED BEFORE RSC SUBMITTED**

Based on the findings and results of the Phase One ESA, two APECs have been identified at the Site; therefore, additional investigations are required in order to support Durham Region's SSQ.

A RSC is not required under O. Reg. 153/04, as the Phase One Property will not be changing to a more sensitive land use.

### **8.2 SIGNATURES**

This report has been completed in accordance with the terms of reference for this project as agreed upon by Plaza 6 Inc. (Client) and Terrapex Environmental Ltd. (Terrapex) and generally accepted engineering or environmental consulting practices in this area.

Terrapex has exercised due care, diligence, and judgement in the performance of this assessment; however, studies of this nature have inherent limitations. This report is intended to provide only a general assessment of the environmental conditions encountered at the Site. By necessity, the findings and observations regarding actual or potential contamination of the property are based solely on the extent of observations and information gathered during the assessment, and subsequent investigations of differing scope may reveal conflicting results. Findings and observations may also change with the passage of time. Where applicable, observations of nearby properties were limited to areas visible from the Site or from publicly accessible areas and vantage points.

Terrapex has relied in good faith on information and representations obtained from the Client and third parties and, except where specifically identified, has made no attempt to verify such information. Terrapex accepts no responsibility for any deficiency or inaccuracy in this report as a result of any misstatement, omission, misrepresentation, or fraudulent act of those providing information. Terrapex shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time of the study.

This report has been prepared for the sole use of Plaza 6 Inc. Terrapex accepts no liability for claims arising from the use of this report, or from actions taken or decisions made as a result of this report, by parties other than Plaza 6 Inc.

The objectives and requirements set out in Schedule D of O. Reg. 153/04 have been applied in carrying out this Environmental Site Assessment.

Respectfully submitted,  
**TERRAPEX ENVIRONMENTAL LTD.**

## TABLES

TABLE 1: CURRENT AND PAST USES OF THE PHASE ONE PROPERTY

| Year | Name Of Owner                     | Description Of Property Use | Property Use    | Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.  |
|------|-----------------------------------|-----------------------------|-----------------|---|
| 1946 | Various individual private owners | Residential                 | Residential Use | <ul style="list-style-type: none"> <li>• 1946 <i>Aerial Photograph</i>: Site appears to have residential dwellings at 666, 668, 678, and 682 Liverpool Road. The remaining area of the Site is undeveloped.</li> <li>• 1966 <i>City Directory</i>: First listing for the Site (666 Liverpool Road)</li> </ul>                                   |
| 1974 | Various individual private owners | Residential                 | Residential Use | <ul style="list-style-type: none"> <li>• 1974 <i>Aerial Photograph</i>: Site appears to now have a residential dwelling at 672 Liverpool Road, the remaining properties on-Site are unchanged.</li> <li>• 1982 <i>Aerial Photograph</i>: An inground swimming pool is located on the western portion of 678 Liverpool Road property.</li> </ul> |
| 2025 | Plaza 6 Inc.                      | Residential                 | Residential Use | <ul style="list-style-type: none"> <li>• 2025 <i>Site Inspection</i>: The Site was observed to be residential land use. A fill pipe for a heating oil tank was observed at 666 Liverpool Road. A fill pile was observed in the backyard of 672 Liverpool Road.</li> </ul>   |

## Notes:

1 - for each owner, specify one of the following types of property use (as defined in O. Reg. 153/04) that applies:

Agriculture or other use | Commercial use | Community use | Industrial use | Institutional use | Parkland use | Residential use

2 - when submitting a record of site condition for filing, a copy of this table must be attached

3 - year is assumed from City Directory and may vary slightly

**TABLE 2: POTENTIALLY CONTAMINATING ACTIVITIES ON, IN OR UNDER THE PHASE ONE PROPERTY AND STUDY AREA**

| PCA <sup>1</sup> | Potentially Contaminating Activity <sup>2</sup>              | Address/ Location/ Distance/ Direction                             | Description  | Data Source     | Likelihood To Affect the Site / Rationale                    | Uncertainty   | Area(s) of Potential Environmental Concern |
|------------------|--|--|--|-----------------|--|---|--|
| PCA 1            | 30 - Importation of Fill Material of Unknown Quality         | On-Site (Central-eastern portion of the Site – 672 Liverpool Road) | Fill pile was observed at the residential property at 672 Liverpool Road                                     | Site Inspection | Possible – Leachate could potentially affect underlying soil | None - Observed   | APEC 1                                     |
| PCA 2            | 28 – Gasoline and Associated Products Storage in Fixed Tanks | On-Site (Southeastern portion of the Site – 666 Liverpool Road)    | Fill pipe as indication of a fuel oil tank in the basement of the residential property at 666 Liverpool Road | Site Inspection | Possible – spills or leaks may have occurred                 | Low – Observed fill pipe. Condition of tank is not known. | APEC 2                                     |
| PCA 3A           | 28 – Gasoline and Associated Products Storage in Fixed Tanks | Off-Site (640 Liverpool Rd – 160 m south-southeast)                | Record of expired oil storage tank   | ERIS Report     | Low - Intervening distance from Site                         | Moderate – Decommissioning status not known               | None                                       |
| PCA 3B           | Other (OT1) – Waste Generator                                |  | Record of waste generator associated with waste oils and lubricants  | ERIS Report     |  | Moderate – Source of waste is unknown                     | None                                       |
| PCA 4            | 28 – Gasoline and Associated Products Storage in Fixed Tanks | Off-Site (1289 Wharf Street – 245 m south)                         | Record of expired oil storage tank   | ERIS Report     | Low - Intervening distance from Site                         | Low   | None                                       |
| PCA 5            | Other (OT1) – Waste Generator                                | Off-Site (747 Liverpool Road – 245 m south)                        | Record of waste generator associated with aliphatic solvents, and petroleum distillates                      | ERIS Report     | Low - Intervening distance from Site                         | Moderate – Source of waste is unknown                     | None                                       |
| PCA 6            | Other (OT1) – Waste Generator                                | Off-Site (1290 Wharf Street – 180 m south-southwest)               | Records of waste generator associated with waste oils & lubricants, lights fuels                             | ERIS Report     | Low - Intervening distance from Site                         | Moderate – Source of waste is unknown                     | None                                       |

| PCA <sup>1</sup> | Potentially Contaminating Activity <sup>2</sup>                   | Address/ Location/ Distance/ Direction               | Description  | Data Source | Likelihood To Affect the Site / Rationale    | Uncertainty   | Area(s) of Potential Environmental Concern |
|------------------|---|--|--|-------------|--|---|--|

| PCA 10           | 43 – Plastics (including Fibreglass) Manufacturing and Processing | Off-Site (641 Liverpool Road – 160 m southeast)      | Record of business associated with plastics product manufacturing    | ERIS Report | Low- Downgradient and distance from the Site | High – Housekeeping processes and operational processes are not known | None                                       |

<sup>1</sup> As shown on Figure 4.

<sup>2</sup> As set out in Table 2 in Schedule D of O. Reg. 153/04.

TABLE 3: AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

| Area of Potential Environmental Concern <sup>1</sup> | Location of Area of Potential Environmental Concern on Phase One Property | Potentially Contaminating Activity <sup>2</sup>                     | Location of PCA (On-Site Or Off-Site) | Contaminants Of Potential Concern <sup>3</sup>  | Media Potentially Impacted (Ground water, Soil, and/or Sediment) |
|--|---|---|---------------------------------------|---|--|
| APEC 1   | Central-eastern portion of the Site                                       | PCA 1: 30 - Importation of Fill Material of Unknown Quality         | On-Site                               | Metals<br>Hydride-forming Metals (As, Sb, Se)<br>ORPs (B-HWS, Hg, CN-, EC, SAR, pH)<br>PAHs<br>BTEX<br>PHCs | Soil   |
| APEC 2   | Southeastern portion of the Site  | PCA 2: 28 - Gasoline and Associated Products Storage in Fixed Tanks | On-Site                               | BTEX<br>PHCs<br>PAHs  | Soil<br>Groundwater (if soil impacts are identified)             |

<sup>1</sup> Areas of potential environmental concern means the area on, in or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through,

- (a) identification of past or present uses on, in or under the Phase One Property, and
- (b) identification of potentially contaminating activity.

<sup>2</sup> Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One study area.

<sup>3</sup> When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act", March 9, 2004, amended as of July 1, 2011, as specified below:

|  |  |  |                               |
|--|--|--|-------------------------------|
| ABNs (Acids, Bases, Neutrals)  | PCBs (Polychlorinated Biphenyls)               | Metals                                     | EC (Electrical Conductivity)  |
| CPs (Chlorophenols)  | PAHs (Polycyclic Aromatic Hydrocarbons)        | As (Arsenic), Sb (Antimony), Se (Selenium) | Cr (VI) (Hexavalent Chromium) |
| 1,4-Dioxane  | THMs (Trihalomethanes)                         | Na (Sodium)                                | Hg (Mercury)                  |
| Dioxins/Furans, PCDDs/PCDFs (Polychlorinated dibenzo dioxins/furans) | VOCs (Volatile Organic Compounds)              | B-HWS (hot water-soluble Boron)            | Methyl Mercury                |
| OCs (Organochlorine Pesticides)                                      | BTEX (Benzene, Toluene, Ethylbenzene, Xylenes) | Cl- (Chloride)                             | Low or high pH                |
| PHCs (Petroleum Hydrocarbons)  | Ca (Calcium), Mg (Magnesium)                   | CN- (Cyanide)                              | SAR (Sodium Adsorption Ratio) |

<sup>4</sup> When submitting a record of site condition for filing, a copy of this table must be attached.

## Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

RE: CITY DIRECTORY RESEARCH  
666-682 Liverpool Road  
Pickering, ON L1W 1R4

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

BEG-650 of Annland Street  
ALL of Broadview Street  
ALL of Commerce Street  
640-750 of Liverpool Road  
ALL of Pleasant Street  
ALL of Wharf Street

# Executive Summary

## Property Information:

**Project Property:** 668-682 Liverpool Rd, Pickering  
n/a Pickering ON

**Project No:** CT4374.00

## **Coordinates:**

**Latitude:** 43.8174335  
**Longitude:** -79.0827414  
**UTM Northing:** 4,853,383.31  
**UTM Easting:** 654,186.01  
**UTM Zone:** UTM Zone 17T

**Elevation:** 265 FT  
80.85 M

## Order Information:

**Order No:** 25052300152  
**Date Requested:** May 23, 2025  
**Requested by:** Terrapex Environmental Ltd.  
**Report Type:** Standard Report

## Historical/Products:

**ERIS Xplorer** [ERIS Xplorer](#)  
**Physical Setting Report (PSR)** [Physical Setting Report \(PSR\)](#)

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial

AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

*Government Publication Date: Sept 2002\**

### **Aggregate Inventory:**

Provincial

AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

*Government Publication Date: Up to Nov 2024*

### **Abandoned Mine Information System:**

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

*Government Publication Date: 1800-Apr 2024*

### **Anderson's Waste Disposal Sites:**

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

*Government Publication Date: 1860s-Present*

### **Aboveground Storage Tanks:**

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

*Government Publication Date: May 31, 2014*

### **Automobile Wrecking & Supplies:**

Private

AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

*Government Publication Date: 1999-Apr 30, 2024*

### **Borehole:**

Provincial

BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

*Government Publication Date: 1875-Jul 2018*

**Certificates of Approval:**

Provincial

CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

*Government Publication Date: 1985-Oct 30, 2011\**

**Dry Cleaning Facilities:**

Federal

CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

*Government Publication Date: Jan 2004-Dec 2022*

**Commercial Fuel Oil Tanks:**

Provincial

CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

*Government Publication Date: Oct 2023*

**Chemical Manufacturers and Distributors:**

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

*Government Publication Date: 1999-Jan 31, 2020*

**Chemical Register:**

Private

CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

*Government Publication Date: 1999-Apr 30, 2024*

**Compressed Natural Gas Stations:**

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

*Government Publication Date: Dec 2012 -Feb 2025*

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

*Government Publication Date: Apr 1987 and Nov 1988\**

**Compliance and Convictions:**

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

*Government Publication Date: 1989-Apr 2025*

**Certificates of Property Use:**

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

*Government Publication Date: 1994 - Apr 30, 2025*

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

*Government Publication Date: 1886 - Aug 2024***Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

*Government Publication Date: Oct 2023***Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

*Government Publication Date: Oct 2011-Mar 31, 2025***Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

*Government Publication Date: 1994 - Apr 30, 2025***Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

*Government Publication Date: Oct 2011-Mar 31, 2025***Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

*Government Publication Date: 1992-2007\****ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

*Government Publication Date: 1999-Aug 31, 2024***Environmental Issues Inventory System:**

Federal

EIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

*Government Publication Date: 1992-2001\**

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2024**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\***Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Jan 2025**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** Oct 31, 2021**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date:** Pre-Jan 2010\*

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date:** 1986-Dec 31, 2024

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date:** 2013-Apr 2024

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date:** 2006-June 2009\*

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1950-Aug 2003\*

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date:** 31 Oct, 2023

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date:** Mar 31, 2022

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date:** 1998-2009\*

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

*Government Publication Date: 1846-Feb 2025*

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

*Government Publication Date: 1974-1994\**

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

*Government Publication Date: Dec 31, 2023*

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

*Government Publication Date: Up to May 2001\**

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

*Government Publication Date: Mar 1999-Nov 2023*

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

*Government Publication Date: 2001-Apr 2007\**

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

*Government Publication Date: 2008-Dec 31, 2024*

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

*Government Publication Date: 1920-Feb 2003\**

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Feb 2024****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2025****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-Aug 2024****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Apr 30, 2025**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011-Mar 31, 2025

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug 2024; Oct-Nov 2024

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date:** Feb 2024

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date:** Feb 2024

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Apr 30, 2025****Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2021****Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2025****Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Apr 30, 2024****Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\*****Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Jun 2024; Aug-Feb 2025****Wastewater Discharger Registration Database:**

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2021****Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\*****Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2024**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date:** Oct 2011 - Mar 31, 2025

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date:** Up to Oct 1990\*

**Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date:** Dec 31 2023

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## **Map 2d. Water Resources System – Significant Groundwater Recharge Areas**

- Significant Groundwater Recharge Areas
- York-Durham Wellhead Protection Area (WHPA) Q1-Q2

Kilometres

## City of Kawartha Lakes

## Peterborough County

## Northumberland County

The map displays the geographical context of the study area. It includes the following regions and features:

- Simcoe County**: Located in the upper right, bordering Lake Simcoe.
- Regional Municipality of York**: A large area to the west of the study area, containing the towns of Uxbridge, Scugog, Pickering, Whitby, Oshawa, and Ajax.
- Lake Simcoe**: A large body of water to the west of the study area.
- City of Toronto**: Partially visible in the bottom left corner.
- Major Roads**: Labeled roads include 401, 407, 412, 7, 12, 48, and 7A.
- Land Use**: The map shows a high density of blue-shaded areas, likely representing developed land or urban sprawl.

The map illustrates the geographical context of the Kawartha Lakes region. It shows the City of Kawartha Lakes, the Mississaugas of Scugog Island First Nation, and Lake Scugog. The area is bounded by Lake Ontario to the south and Lake Scugog to the west. Major roads shown include 35, 115, 407, 418, and 401. The town of Clarington is also depicted. A detailed inset map provides a closer look at the Mississaugas of Scugog Island First Nation and Lake Scugog.

**Note:**

**ASSESSMENT OF HABITAT FOR THREATENED AND ENDANGERED SPECIES**  
**666-682 LIVERPOOL RD, PICKERING**

**Species at risk potentially present?**

|   |                   |
|---|-------------------|
| There are no threatened or endangered species likely to occur within, or within 30 m of the site. | Species list: N/A |
|---|-------------------|

**Habitat at risk potentially present?**

|  |                                 |
|--|---------------------------------|
| Determined that there are no such areas within, or within 30 m of the site | Description of the habitat: N/A |
|--|---------------------------------|

**Species at Risk with potential to occur within the Site (Highlighted).**

| Common Name                    | Scientific Name               | Rationale for Consideration        | SARO Status <sup>1</sup> | Habitat type     | Candidate Habitat Present Within Site?  | General Habitat Description   | References  |
|--------------------------------|-------------------------------|------------------------------------|--------------------------|------------------|---|---|---|
| American Ginseng               | <i>Panax quinquefolius</i>    | Vascular Plants at Risk in Ontario | THR                      | General (Guided) | No. The site and its 30 m do not consist of any natural vegetation with the capacity of functioning as the habitat of rare plant species. | Across its Ontario distribution, American Ginseng often grows in the herb layer of rich, mature deciduous forests, but also occurs in mixed forest and coniferous or mixed swamps. American Ginseng is an obligate understory species and is typically found under an overstory that provides approximately 75 percent shade. The species grows in mature deciduous forest stands with moderately moist to well-drained, generally rich in nutrients with a pH of moderately acid to neutral soils. Sites generally have few shrubs present in the understory. Research indicates that the species is often associated with seepage sites and floodplains of first-order of intermittent streams (MECP 2019).             | MECP. 2019. Recovery Strategy for the American Ginseng ( <i>Panax quinquefolius</i> ) in Ontario. Ontario Recovery Strategy Series. Prepared by the Ministry of the Environment, Conservation and Parks, Peterborough, Ontario. iv + 9 pp. + Appendix. Adoption of the Recovery Strategy for American Ginseng ( <i>Panax quinquefolius</i> ) in Canada (Environment Canada 2018). |
| Red Mulberry                   | <i>Morus rubra</i>            | Vascular Plants at Risk in Ontario | END                      | General (Guided) | No. The site and its 30 m do not consist of any natural vegetation with the capacity of functioning as the habitat of rare plant species. | Red Mulberry is a moderately shade tolerant understory tree found in moist, sheltered coves near streams and where the canopy is open to allow penetration of sunlight. In Ontario, Red Mulberry occurs in fresh to moist, well-drained, forested habitats, including floodplains, bottomlands, the slopes and ravines along the southern portion of the Niagara escarpment and in swales on some western Lake Erie sand spits. Although Red Mulberry is moderately shade tolerant, forest openings of exposed mineral soil, free of competition, appear to promote better recruitment (OMNR 2013).   | Ontario Ministry of Natural Resources. 2013. Recovery Strategy for the Red Mulberry ( <i>Morus rubra</i> ) in Ontario. Ontario Recovery Strategy Series. Ontario Ministry of Natural Resources, Peterborough, Ontario. iii + 5 pp + Appendix vi + 47 pp. Adoption of the Recovery Strategy for the Red Mulberry ( <i>Morus rubra</i> ) in Canada (Parks Canada Agency 2011).      |
| Eastern Prairie Fringed-Orchid | <i>Platanthera leucophaea</i> | Vascular Plants at Risk in Ontario | END                      | Regulated        | No. The site and its 30 m do not consist of any natural vegetation with the capacity of functioning as the habitat of rare plant species. | Eastern Prairie Fringed-orchid requires open conditions with full sunlight for optimal growth and flowering, which restricts it to graminoid-dominated vegetation communities. Eastern Prairie Fringed-orchid favours neutral to slightly calcareous soils and is currently found in fens, along fluctuating limestone shorelines and in wet-mesic prairie and old field habitats (EPFORT 2010).  | Eastern Prairie Fringed-orchid Recovery Team. 2010. Recovery strategy for the Eastern Prairie Fringed-orchid ( <i>Platanthera leucophaea</i> ) in Ontario. Ontario Recovery Strategy Series. Prepared for the Ontario Ministry of Natural Resources, Peterborough, Ontario. vi + 30 pp.   |
| American Eel                   | <i>Anguilla rostrata</i>      | NHIC                               | END                      | General          | No. The Site and its 30 m are not within or near any watercourse or aquatic habitat.  | The American Eel uses a broad diversity of habitats during its growth period including oceanic, estuarine, freshwater. Growing eels are primarily benthic, utilizing substrate (rock, sand and mud), bottom and woody debris, and submerged vegetation for protection and cover. Vegetation (e.g., eel grass) and interstitial spaces consisting of rock piles, logs and other complex structures are important to eels as cover, particularly during daylight hours. Given the high abundance of eels often observed in tributaries, tributary waters seem to be a very important component of eel habitat. Habitat in tributaries is often of high quality and less disturbed than other areas (MacGregor et al., 2013) | MacGregor, R., J. Casselman, L. Greig, J. Dettmers, W. A. Allen, L. McDermott, and T. Haxton. 2013. Recovery Strategy for the American Eel ( <i>Anguilla rostrata</i> ) in Ontario. Ontario Recovery Strategy Series. Prepared for Ontario Ministry of Natural Resources, Peterborough, Ontario. x + 119 pp.  |

ASSESSMENT OF HABITAT FOR THREATENED AND ENDANGERED SPECIES  
666-682 LIVERPOOL RD, PICKERING

| Common Name        | Scientific Name             | Rationale for Consideration | SARO Status <sup>1</sup> | Habitat type     | Candidate Habitat Present Within Site?  | General Habitat Description   | References   |
|--------------------|-----------------------------|-----------------------------|--------------------------|------------------|---|---|--|
| Blanding's Turtle  | <i>Emydoidea blandingii</i> | NHIC;ORAA                   | THR                      | General (Guided) | No. The Site and its 30 m are not within or near any wetland or aquatic habitat.  | The Blanding's Turtle is a semi-aquatic species. Although it spends most of its time in aquatic habitats, it has seasonal movement patterns which allow it to meet different biological or behavioural needs, including the use of terrestrial habitats during the active season. Habitat use varies as a function of the different activities undertaken by individuals to complete their life cycle. Blanding's Turtles use aquatic habitats for overwintering, mating, foraging, thermoregulation, summer inactivity, and movement. They often favour relatively eutrophic environments, with shallow water (less than 2 m deep, often less than 50 cm), soft highly organic substrates, and abundant submergent, floating, and emergent vegetation. They can occur in a variety of wetland habitats (e.g., marshes, ponds, swamps, bogs, fens, coastal wetlands), slow-flowing rivers and creeks, pools, lakes, bays, sloughs, marshy meadows, and artificial channels. Blanding's Turtles have been shown to select all wetland types over lotic environments and have also shown a preference for ponds and marshes when available (MECP 2019). | Ministry of the Environment, Conservation and Parks. 2019. Recovery Strategy for the Blanding's Turtle ( <i>Emydoidea blandingii</i> ) in Ontario. Ontario Recovery Strategy Series. Prepared by the Ministry of the Environment, Conservation and Parks, Peterborough, Ontario. iv + 6 pp. + Appendix. Adoption of the Recovery Strategy for Blanding's Turtle ( <i>Emydoidea blandingii</i> ), Great Lakes / St. Lawrence population, in Canada (Environment and Climate Change Canada 2018).  |
| Chimney Swift      | <i>Chaetura pelagica</i>    | OBBA                        | THR                      | General (Guided) | No. The site and its 30m do not consist of any chimneys or hollow tree that could function as the bird's nesting site.  | Chimney Swift have historically nested in large hollow trees, other tree cavities and cracks in cliffs, but now tend to nest in chimneys and other anthropogenic structures, such as silos, wells and abandoned buildings, found within urban environments (Cadman et al. 2007, COSSARO 2020).  | Cadman, M.D., D.A. Sutherland, G.G. Beck, D. Lepage, and A.R. Couturier (eds.). 2007. Atlas of the Breeding Birds of Ontario, 2001-2005. Bird Studies Canada, Environment Canada, Ontario Field Ornithologists, Ontario Ministry of Natural Resources, and Ontario Nature, Toronto, xxii + 706 pp. COSSARO 2020. Ontario Species at Risk Evaluation Report for Chimney Swift, Martinet ramoneur ( <i>Chaetura Pelagica</i> ).  |
| Least Bittern      | <i>Ixobrychus exilis</i>    | OBBA                        | THR                      | General          | No. The Site and its 30 m are not within or near any wetland or aquatic habitat.  | In Ontario, the Least bittern is found in a variety of wetland habitats but strongly prefers cattail marshes with a mix of open pools and channels (OMNR 2016).   | Ontario Ministry of Natural Resources and Forestry. 2016. Recovery Strategy for the Least Bittern ( <i>Ixobrychus exilis</i> ) in Ontario. Ontario Recovery Strategy Series. Prepared by the Ontario Ministry of Natural Resources and Forestry, Peterborough, Ontario. v + 5 pp. + Appendix.  |
| Acadian Flycatcher | <i>Empidonax virescens</i>  | OBBA                        | END                      | General          | No. The site and its 30 m does not consist of the canopy density suitable to support the presence of the species.   | Most commonly encountered in large blocks of mature, primarily deciduous, closed-canopy forest, with an open to sparse understorey and ground layer. Often, territories are located near woodland pools or along streams in heavily wooded ravines (Cadman et al. 2007).  | Cadman, M.D., D.A. Sutherland, G.G. Beck, D. Lepage, and A.R. Couturier (eds.). 2007. Atlas of the Breeding Birds of Ontario, 2001-2005. Bird Studies Canada, Environment Canada, Ontario Field Ornithologists, Ontario Ministry of Natural Resources, and Ontario Nature, Toronto, xxii + 706 pp.   |
| Bank Swallow       | <i>Riparia riparia</i>      | OBBA                        | THR                      | General (Guided) | No. The site and its 30 m are not within the 50 m of any waterbody and shoreline abd are ecologically disconnected from the nearest shoreline with development. | Bank Swallows have traditionally nested in exposed banks created by erosion along watercourses and lakeshores but have adapted to nest at artificial sites (i.e., sand and gravel pits, along roadsides, and in stockpiles of soil and other materials) (Cadman et al. 2007). Bank Swallows require a vertical or near-vertical bank of a suitable substrate for nesting sites (Falconer et al. 2016).  | Cadman, M.D., D.A. Sutherland, G.G. Beck, D. Lepage, and A.R. Couturier (eds.). 2007. Atlas of the Breeding Birds of Ontario, 2001-2005. ASSESSMENT OF HABITAT FOR THREATENED AND ENDANGERED SPECIES  
666-682 LIVERPOOL RD, PICKERING

| Common Name          | Scientific Name              | Rationale for Consideration                               | SARO Status <sup>1</sup> | Habitat type     | Candidate Habitat Present Within Site?   | General Habitat Description   | References   |
|----------------------|------------------------------|---|--------------------------|------------------|--|---|--|
| Yellow-breasted Chat | <i>Icteria virens</i>        | OBBA  | END                      | General          | No. The canopy within the site and its 30 m consists of maintained ornamental and landscaped trees and lacks successional regeneration favourable for the bird's presence. | The Yellow-breasted Chat is an open-canopy obligate species, and occupies early successional shrub habitats, with low, dense deciduous or coniferous vegetation (ECCC 2019). Nesting habitat in Ontario includes regenerating old fields, forest edges, railway and hydro rights-of-way, young coniferous reforestations and, occasionally, wet thickets bordering wetlands. Tangles of grape and raspberry are a feature of most breeding sites (Cadman et al. 2007). Some research suggests that the species may be area sensitive, preferring large (i.e., > 10 ha) areas of suitable habitat, but one study found the minimum patch size to support Yellow-breasted Chat to be 2.3 ha. Within habitat patches, investigators have documented territories that average 1.2 ha. Continuous tracts of suitable habitat or clusters of habitat within close proximity (i.e., 500 m) are likely important features to allow multiple pairs to colonize an area (ECCC 2019).                            | Cadman, M.D., D.A. Sutherland, G.G. Beck, D. Lepage, and A.R. Couturier (eds.). 2007. <i>Atlas of the Breeding Birds of Ontario, 2001-2005</i> . Bird Studies Canada, Environment Canada, Ontario Field Ornithologists, Ontario Ministry of Natural Resources, and Ontario Nature, Toronto, xxii + 706 pp. Environment and Climate Change Canada. 2019. Recovery Strategy for the Yellow-breasted Chat <i>virens</i> subspecies ( <i>Icteria virens virens</i> ) in Canada. Species at Risk Act Recovery Strategy Series. Environment and Climate Change Canada, Ottawa. xi + 43 pp.               |
| Bobolink             | <i>Dolichonyx oryzivorus</i> | OBBA; NHIC  | THR                      | General (Guided) | No. The site and its 30 m lack any grassland or grassland-like habitats that could function as the bird's nesting site.  | Bobolink breed in relatively tall vegetation typically associated with hayfields and other grasslands, with nesting success being greatest in undisturbed fields or those mown in mid- to late summer (Cadman et al. 2007).   | Cadman, M.D., D.A. Sutherland, G.G. Beck, D. Lepage, and A.R. Couturier (eds.). 2007. <i>Atlas of the Breeding Birds of Ontario, 2001-2005</i> . Bird Studies Canada, Environment Canada, Ontario Field Ornithologists, Ontario Ministry of Natural Resources, and Ontario Nature, Toronto, xxii + 706 pp.   |
| Eastern Meadowlark   | <i>Sturnella magna</i>       | OBBA; NHIC  | THR                      | General (Guided) | No. The site and its 30 m lack any grassland or grassland-like habitats that could function as the bird's nesting site.  | Eastern Meadowlarks breed in moderately tall grasslands (e.g., pastures and hayfields), but can also be found in alfalfa fields, weedy borders of croplands, roadsides, orchards, airports, shrubby overgrown fields, or other open areas. Sites typically contain small trees, shrubs or fence posts which are used as song perches (MECP 2025).   | MECP. 2025. Species at risk in Ontario. Available from: <a href="https://www.ontario.ca/page/species-risk-ontario">https://www.ontario.ca/page/species-risk-ontario</a> .  |
| Hoary Bat            | <i>Lasiusurus cinereus</i>   | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General          | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat.                         | Hoary Bats typically roost alone, or with their pups, among the foliage of trees and occasionally shrubs. Trees used as maternity roosts by the bat tend to be large in diameter and tall, reaching or exceeding the height of the surrounding canopy. They use both deciduous and coniferous forests of any age class. Roost sites have overhead foliage for cover and open flight space below. Roosting appears to occur near the edge of the crown and at sufficient heights to prevent access by mammalian predators. Reproductive bats may select roost sites with southern aspects. Roosts are typically located in sites sheltered from the wind. Since individuals show high inter-annual roosting area fidelity, they do not require a large area for roosting (COSEWIC 2023).   | COSSARO 2024, Ontario Species at Risk Evaluation Report for Hoary Bat.<br>COSEWIC. 2023. COSEWIC assessment and status report on the Hoary Bat <i>Lasiusurus cinereus</i> , Eastern Red Bat <i>Lasiusurus borealis</i> and the Silver-haired Bat <i>Lasionycteris noctivagans</i> , in Canada. Committee on the Status of Endangered Wildlife in Canada. Ottawa. xxi + 101 pp.<br>( <a href="https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html">https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html</a> ). |
| Eastern Red Bat      | <i>Lasiusurus borealis</i>   | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General          | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat.                         | Eastern Red Bats roost alone, or with their pups, among the foliage of trees and occasionally shrubs. Trees used as maternity roosts by the bat tend to be large in diameter and tall, reaching or exceeding the height of the surrounding canopy. Male Bats, rarely reported for reproductive females, have been observed using saplings as roosts. Eastern Red Bats use deciduous and coniferous forests, of any age class. But, in their eastern range, when suitable deciduous forests exist, they avoid coniferous forests. Roost sites that have overhead foliage for cover and open flight space below. Roosting appears to occur near the edge of the crown and at sufficient heights to prevent access by mammalian predators. Reproductive bats may select roost sites with southern aspects, roosts are typically located in sites sheltered from the wind. Since individuals show high inter-annual roosting area fidelity, they do not require a large area for roosting (COSEWIC 2023). | COSEWIC. 2023. COSEWIC assessment and status report on the Hoary Bat <i>Lasiusurus cinereus</i> , Eastern Red Bat <i>Lasiusurus borealis</i> and the Silver-haired Bat <i>Lasionycteris noctivagans</i> , in Canada. Committee on the Status of Endangered Wildlife in Canada. Ottawa. xxi + 101 pp.<br>( <a href="https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html">https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html</a> ).   |

**ASSESSMENT OF HABITAT FOR THREATENED AND ENDANGERED SPECIES**  
**666-682 LIVERPOOL RD, PICKERING**

| Common Name         | Scientific Name                  | Rationale for Consideration                               | SARO Status <sup>1</sup> | Habitat type | Candidate Habitat Present Within Site?   | General Habitat Description  | References  |
|---------------------|----------------------------------|---|--------------------------|--------------|--|--|---|
| Silver-haired Bat   | <i>Lasionycteris noctivagans</i> | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General      | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat. | Silver-haired bats primarily inhabit forests including coniferous, mixed, and deciduous forests. They roost under the loose bark or in the cavities of mainly aged, large-diameter, decaying trees. They occasionally use anthropogenic structures for roosting when natural roosting is unavailable, especially during migration. Riparian forests are especially important for the bat as they function as the migration corridors for the bat. Silver-haired bats are migratory animals and overwinter in southern areas in tree cavities or where tree cavities and shallow barks are not available, they hibernate in caves or anthropogenic structures (COSSARO 2023). | COSSARO 2023. Ontario Species at Risk Evaluation Report for Silver-haired Bat<br>Chauve-souris argentée ( <i>Lasionycteris noctivagans</i> )  |
| Little Brown Myotis | <i>Myotis lucifugus</i>          | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General      | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat. | Little Brown Myotis occur in a wide range of deciduous and coniferous forest stands. They generally avoid large areas of cleared land, such as farm fields, clearcuts, and large post-fire landscapes. Instead, they forage over still water, rivers and in forest gaps, edges, or along trails. Maternity colonies often exist in warm sites that facilitate pup growth rates, such as attics of buildings and under bridges, in rock crevices, or in cavities of canopy trees in forests (COSEWIC 2013). Trees with a dbh $\geq$ 10 cm with loose bark, cracks and/or cavities (i.e., snags) have the potential to function as maternity roost habitat.                    | COSEWIC. 2013. COSEWIC assessment and status report on the Little Brown Myotis <i>Myotis lucifugus</i> , Northern Myotis <i>Myotis septentrionalis</i> and Tri-colored Bat <i>Perimyotis subflavus</i> in Canada. Committee on the Status of Endangered Wildlife in Canada. Ottawa. xxiv + 93 pp. |
| Northern Myotis     | <i>Myotis septentrionalis</i>    | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General      | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat. | Northern Myotis occur in a wide range of deciduous and coniferous forest stands. They generally avoid large areas of cleared land, such as farm fields, clearcuts, and large post-fire landscapes. Instead, they forage over rivers and in forest gaps, edges, or along trails. Females rarely roost in human-made structures. Trees with a dbh $\geq$ 10 cm with loose bark, cracks and/or cavities (i.e., snags) have the potential to function as maternity roost habitat (COSEWIC 2013).   | COSEWIC. 2013. COSEWIC assessment and status report on the Little Brown Myotis <i>Myotis lucifugus</i> , Northern Myotis <i>Myotis septentrionalis</i> and Tri-colored Bat <i>Perimyotis subflavus</i> in Canada. Committee on the Status of Endangered Wildlife in Canada. Ottawa. xxiv + 93 pp. |
| Tri-colored Bat     | <i>Perimyotis subflavus</i>      | Habitat Characteristics-<br>i.e. the presence of woodland | END                      | General      | No. The canopy cover within the site and its 30 m is thin and sparse with negligible capacity to provide sustainable roosting habitat for the bat. | During the summer, the Tri-colored Bat occurs in a variety of forested habitats and forages most commonly over water and at forest edges (Naughton 2012). The bats form day roosts and maternity colonies in clusters of dead leaves, particularly in Oak or Maple trees with a dbh $\geq$ 10 cm, and occasionally in barns or other anthropogenic structures (COSEWIC 2013, MECP 2025).   | COSEWIC. 2013. COSEWIC assessment and status report on the Little Brown Myotis <i>Myotis lucifugus</i> , Northern Myotis <i>Myotis septentrionalis</i> and Tri-colored Bat <i>Perimyotis subflavus</i> in Canada. Committee on the Status of Endangered Wildlife in Canada. Ottawa. xxiv + 93 pp. |

**SARO Status Legend**

|            |   |
|------------|---|
| <b>END</b> | Endangered - the species lives in the wild in Ontario but is facing imminent extinction or extirpation  |
| <b>THR</b> | Threatened - the species lives in the wild in Ontario, is not endangered, but is likely to become endangered if steps are not taken to address factors threatening it |

| <b>Position:</b>       | Project Manager, Toronto Office  |                 |
| <b>Qualifications:</b> | Licenced Engineering Technologist (L.E.T.), registered with Professional Engineers of Ontario<br>Certified Engineering Technologist (C.E.T.), registered with O.A.C.E.T.<br>Environmental Professional (E.P.), registered with the Canadian Environmental Certification Approvals Board (CECAB)<br>Environmental Technologist Advanced Diploma<br>Environmental Technician Diploma |                 |
| <b>Experience:</b>     | Terrapex Environmental Ltd.  | 2008 to present |
|                        | The Wye Marsh Wildlife Centre  | 2007 to 2008    |
|                        | Windfall Ecology Centre, Green Communities Ontario   | 2007 to 2008    |
|                        | Central Lake Ontario Conservation Authority  | 2006            |

Ms. Sutherland is a Project Manager, coordinating and supervising site assessment projects for commercial, government, and developer clients. Ms. Sutherland has experience managing and conducting Phase I/One Environmental Site Assessments including; historical research, site inspection, report preparation, and Phase II/Two ESAs and monitoring programs. She has expertise with field combustible vapour surveys, waste audits, borehole drilling, well installation, topographical surveys, materials and supplies sourcing, test pit excavation, contaminated soil remedial excavation, removal of storage tanks, and the collecting of various media samples (soil, soil vapour, air, groundwater, surface water) in accordance with Provincial protocols. As a QP<sub>ESA</sub> under O.Reg. 153/04, Ms. Sutherland is also responsible for the filing of Records of Site Condition (RSC).

### **Representative projects include the following:**

Various Clients: Managed and supervised large work programs including Phase One and Two ESAs, remedial work, coordinating environmental, geotechnical, hydrogeological, and ecological aspects utilizing various employees from different departments and offices within the company, and assisting in the preparation of documents for the purposes of risk assessment and filing a RSC at various sites in Ontario, including industrial, commercial, residential, historical, and vacant properties.

Various Clients: Conducted Designated Substances Surveys for industrial, commercial and residential sites, for the purpose of identifying suspected locations of "designated substances" per Ontario Occupational Health and Safety Act.

Suncor Energy Products Partnership: Post-remedial excavation; supervised the installation of a reactive wall to provide an immediate and long-term source of biostimulants to promote biodegradation of any errant petroleum compounds potentially migrating downgradient.

Industrial Clients: Supervised soil vapour probe installation and conducted monitoring and sampling of soil vapours, utilizing various sampling media including: Tedlar bags using lung box, SUMMA canisters, hopcalite/charcoal/TD tubes, and passive air samplers.

Insurance Company: Reviewed multiple reports for multiple sites and summarizing site conditions, impacts, information deficiencies and regulatory actions required.

Safety Kleen Inc.: Coordinated and supervised the semi-annual Contaminant Management Plan. Conducted the Phase One ESA and supervised the Phase Two ESA, remedial excavations, application of oxidants to soil, and prepared the reports required in support of a Risk Assessment. Assisted in setting up and operating an on-site mobile water treatment system to collect and treat water discharged from the remedial excavations during the work program.

Developer: Managed a long-term hydrogeological assessment incorporating the installation and monitoring of on-site monitoring wells and mini-piezometers, and recording surface flow parameters and/or water levels of on-site streams and waterbodies. Completion of excess soils management services providing chemical analysis and assessment of soil for the exporting of impacted soil to a beneficial re-use site, and importing soil to the same site for grading purposes through the preparation of Assessment of Past Use report, sampling and analysis plan, and soil characterization report, in accordance with O.Reg. 406/19.

Cloud Data Centres: Conducted an Environmental Compliance Review and Audit to assess compliance with Ontario provincial regulations for areas that included: air emissions; waste management; discharges; spill prevention; and chemical storage and handling.

Ms. Annette Chan is an Environmental Scientist, responsible for planning, coordinating, and executing a range of Phase I/One and Phase II/ Two Environmental Site Assessments programs and remediation programs. She is proficient in executing Phase I Environmental Site Assessments, including historical research and records review, site inspections, interview, and report preparation. Besides, Ms. Chan is proficient in completing Phase II Environmental Site Assessments, which include the coordination and supervision of borehole drilling and grounding monitoring well installations, logging and collection of soil samples, groundwater well development, monitoring and sample collection, data tabulation, data analysis, and report preparation.

As an Environmental Scientist, Ms. Chan is responsible for the following duties:

- Phase I/One Environmental Site Assessment including: historical research and records review, site inspections, interviews, and report preparation.
- Phase II/Two Environmental Site Assessments including: coordination and supervision of borehole drilling and monitoring well installation, soil logging and sampling, groundwater well development, groundwater monitoring and sample collection, soil vapor monitoring, site surveying, private and public locates supervision, data tabulation, and report preparation.
- Remediation activities including: managing and tracking samples and hydro vacuuming of fuel product from monitoring wells.
- Hydrogeological investigations including: rising and falling head testing, barologger installation, and groundwater hydraulic gradients and conductivity calculations.
- Collection, labelling, handling, and submission of soil and groundwater samples to the laboratory.
- Preparation of health and safety plans for field work and conducting health and safety meetings with field team members and contractors.
- Preparation of health and safety plans for field work and conducting health and safety meeting with field team members and contractors.

Ms. Chan has project experiences with a wide range of clients including municipal agencies, petroleum companies, and real estate and development agencies.
